

# MOBISCREEN MSS EVO

EVO

MOBILE SCREENING PLANT MOBISCREEN MSS 502i EVO | MSS 802i EVO

## **MOBISCREEN MSS 502i EVO | MSS 802i EVO**

Material flow

2 Operating concept

► Handling and sustainability

### 1 Feed hopper

- > MSS 802i EVO: Hopper rear wall can be folded to three different heights for optimum material transfer even at low feed heights
- > MSS 502i EVO: Hopper rear wall can be easily folded
- > Independently folding filling aids + for easy wheel loader feeding from the side and rear
- > Apron feeder + for especially coarse material
- > Safe and convenient retraction and extension of the feed unit and folding and unlocking/locking of the filling aids from the ground via the mobile control unit
- > MSS 802i EVO: Interchangeable + KRS wear plates, easy to replace

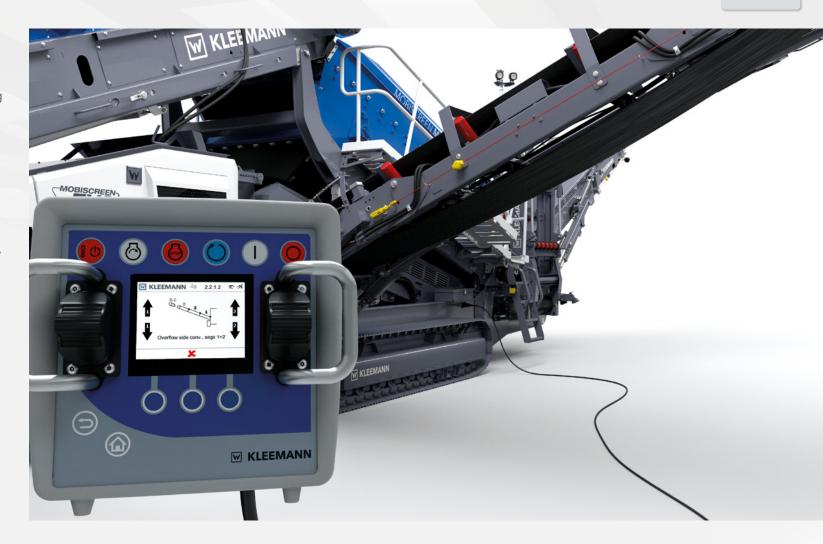

1 Feed hopper	3 Drive	Material flow
2 Operating concept	4 Screen	> Handling and sustainability

### 2 Operating concept

- > Simple operating concept reduces the risk of operating errors
- > Mobile, wired operating device for perfect viewing of the executed functions from a safe distance
- > Radio remote control + for comfortable control of the driving function and the hopper discharge conveyor
- > Better planning and analysis of the plant thanks to the telematics solution
- > Automatic start for starting production easily and quickly

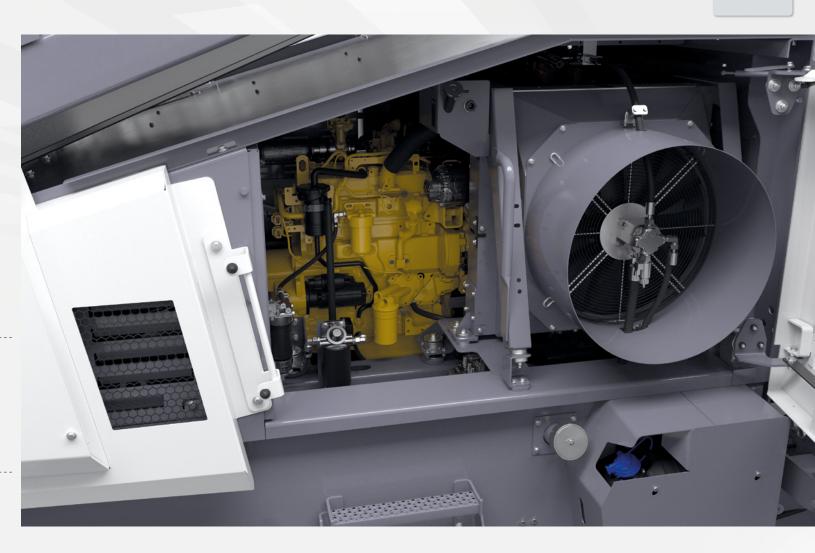

### 3 Drive

- > Well-thought-out hydraulics concept for efficient power transmission and reduced operating costs
- > Flexible refuelling from both sides
- > Ease of physical and visual access to all components relevant to maintenance

Electric operation through external power supply for emission-free work and lower operating costs thanks to electro-hydraulic Dual-Power drive

KLEEMANN SUSTAINABILITY describes innovative technologies and solutions which are consistent with the sustainability objectives of the WIRTGEN GROUP.

#### 4 Screen

- > Large selection of screen surfaces for application flexibility, configuration diversity of individual screen segments
- > Screen casing angle with a wide adjustment range of 15.4 20° to optimize the screening performance while maintaining high product quality
- > Material brakes + and/or chain curtain +, can be installed in two positions on the screen casing, for adapting the upper deck to difficult feed material
- > Lower deck with banana profile, steeper angle of screen media on the inlet side for improved screening efficiency; flatter angle on the discharge side for increased final product quality

Handling and sustainability

#### Material flow

- > Optimized material guidance with 48" (MSS 502i EVO)/ 56" (MSS 802i EVO) wide main discharge conveyor for higher production output
- > Simple conversion from 3 to 2 final grain sizes increases application flexibility
- > Speed of all conveyor belts can be adjusted steplessly
- Magnetic separator + (MSS 802i EVO only) and magnetic drum + protect downstream crushers and increase material quality
- > Generous material transfer to the screen deck for ideal usage of the screening surface
- > Large discharge heights and therefore higher stockpiles thanks to extended main discharge conveyor + and extendable side discharge conveyors + (MSS 802i EVO only)
- > Line coupling + allows process and safety-related technical coupling with all KLEEMANN EVO and PRO plants; optimized material flow and enhanced safety throughout the entire plant train
- > The stockpile probe + required for process coupling can be placed on any discharge conveyor of the plant for more application flexibility
- > MSS 802i EVO: additional hydraulic port for operating a stockpile conveyor

1 Feed hopper	3 Drive	> Material flow
2 Operating concept	4 Screen	> Handling and sustainability

### Safety & ergonomics

- > Quick and convenient service thanks to very good access to all components requiring maintenance
- > LED lighting in compliance with standards included in the basic configuration; Premium lighting \* for extended illumination of the material flow and transfer points
- > Simple and fast cleaning of the hopper discharge conveyor underflow thanks to a removable chute
- > Extended, extra-wide work platforms and horizontally adjustable screen casing enable ergonomic access to all screen decks

#### Transport

- > Folding of the side discharge conveyors without the disassembly of parts reduces set-up times and the risk of damage
- > Precise loading and positioning of the plant thanks to stepless drive control

### **Environment**

- > Pre-installed water spray system for dust reduction; with electric water pump + for autonomous supply of the spray system
- > Temperature-controlled fan reduces the noise level and diesel consumption

TECHNICAL INFORMATION	MSS 502i EVO	MSS 802i EVO
Туре	Scalping screen	Scalping screen
Screen decks	2	2
Screening surface	4' 5" x 13' 1"	5' 1" x 16'
Feed capacity up to approx. (US t/h)	386	551
Max. feed size	26" x 16" x 10"	32" x 20" x 12"
Transport height approx. *	10' 3"	11' 2"
Transport length approx. *	47' 3"	51' 12"
Transport width approx.*	9' 10"	9' 10"
Transport weight of basic plant - max. configuration (lbs)	58,450 - 73,950	70,350 - 84,900
